

# Dynamic Stock&Logistics

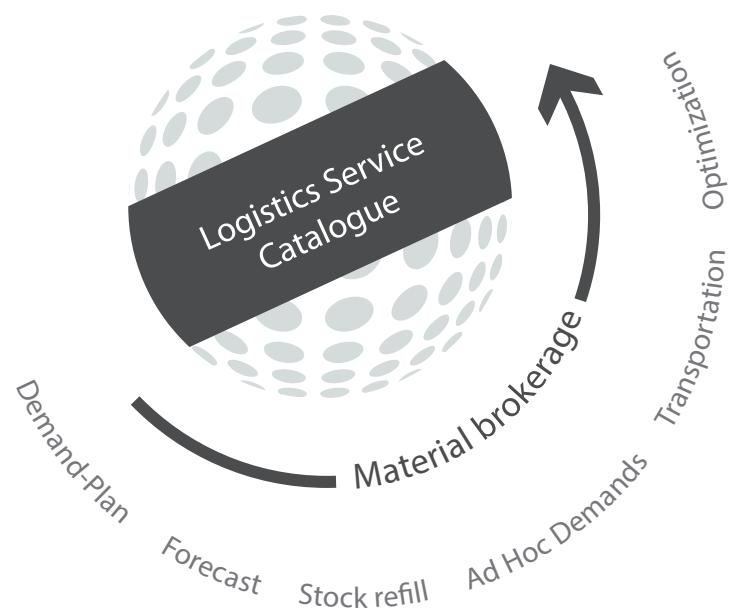

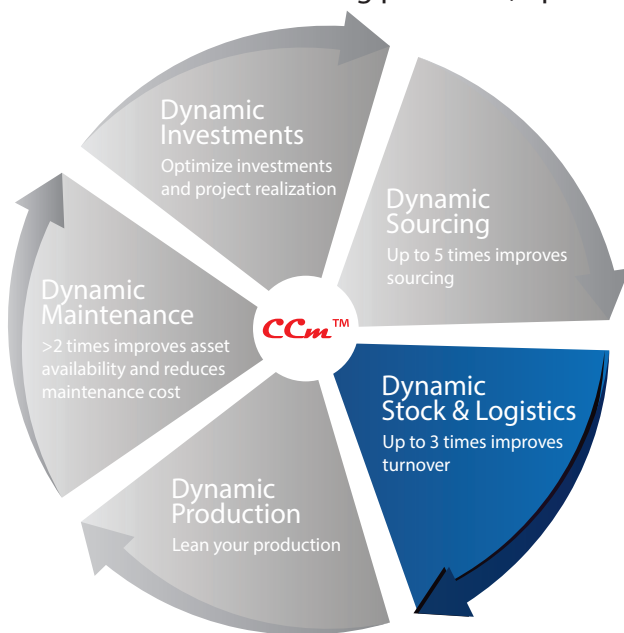

Oversized stock increases cost and if undersized may jeopardize delivery and production. Inflexibility in supply chain management may raise the cost and lower the revenue.

**CCm™ L Dynamic Stock & Logistics accelerate material turnover, optimizes stock, manages waste and remnants, optimize cost and ensures revenue.**

## CCm™ L Dynamic Stock & Logistics - Accelerate and optimize stock turnover

Automate material handling processes, optimize stock and accelerate and optimize stock turnover.

### Dynamic Stock&Logistics

**Dynamic material, stock and logistics management**  
**>2 reduces** material on stock and improves turnover

#### MATERIAL FLOW PROCESS ACCELERATION

Material flow process acceleration reduces administration workload. Logistics Service Catalogue with unique Contract Manager enables single end user to manage multiple warehouses stock, multiple vendors, and multiple transportation companies. Built In powerful process and rule engine takes care about handling requisitions, PO's, work orders.

#### AUTOMATED STOCK AND TURNOVER OPTIMIZATION

Optimized stock ensures revenue, reduces cost and improves cash flow. **CCm™ L** is able to apply different policies and commercial rules for production material and final product. Depending on forecast demands, stock level and turnover KPI's, **CCm™ L** system is able to adjust dynamically optimum stock per material or product on multiple warehouses and prioritizes purchasing, delivery and logistics activities.

#### WASTE AND REMNANTS MANAGEMENT

By selling or recycling waste and remnants you may transfer a part of your cost into revenue. **CCm™ L** system supports waste and remnants management. With material and scrape localized attributes and waste management contracts, **CCm™ L** is able to turn it into revenue. This will support your ISO 14000 compliance and certification.

#### CONTRACT AND SERVICE LEVEL MANAGEMENT

Automated contract and SLA realization control enables production and business continuity. **CCm™ L** Contract Management system monitors contract realization, expiration and service level compliance. It may automatically propose contract renewal or penalty charges if service level violation occur. Integrated with CMC S & ERP system the whole process might be multiple accelerated with reduced administration.
